Re: Reliability Improvement Project - Scenic Loop Substation

Dear CPS Energy Customer:

Thank you for allowing us to serve your energy needs. We are writing to provide you with an update on the Scenic Loop Substation and Transmission Line Project approved by CPS Energy's Board of Trustees on January 31, 2022.

Our project team has completed the Scenic Loop Substation sitework design. Construction at the substation site is expected to start Tuesday, September 5, 2023. CPS Energy's civil contractor for the sitework construction is E-Z Bel. We do not expect any construction-related power outages while the sitework construction is being performed.

Following sitework construction, CPS Energy crews will continue with the substation's internal civil construction and electrical construction. The overall substation construction and energization is scheduled for completion in June 2025.

The map below illustrates the substation site location.

The Scenic Loop Substation is needed to keep pace with customer growth and to strengthen reliability for our existing customers.

For more detailed project information, visit cpsenergy.com/infrastructure. If you have any questions about the project, please feel free to contact me at **(210)353-3114** or by emailing ktphillips@cpsenergy.com.

Thank you for your patience and understanding while we complete the Scenic Loop Substation project to better serve you and our growing community.

Sincerely,

Kevin Phillips
Project Manager
